

Design sensitivity of the Statins expert-auto MeSH gap

Effect of evaluation design on expert-vs-auto MeSH gap

Evaluation design	Gap	95% CI
Canonical BoW (5-fold, full n=2,744)	0.096	[+0.075, +0.116]
Subsampled BoW (5-fold, n=803)	0.033	[-0.022, +0.092]
10-fold BoW (10-fold, full n=2,744)	0.021	[+0.001, +0.041]
BiomedBERT (5-fold, truncated 512)	0.020	[-0.021, +0.062]
